Dear Governor Carcieri, Members of the General Assembly and fellow Rhode Islanders:

The Rhode Island Clean Water Finance Agency (the Agency) is pleased to submit its Fiscal Year 2007 Annual Report. The Agency, established in 1989 by the Rhode Island General Assembly, was created as a body politic and corporate; a public instrumentality of the State to administer certain federal and state programs relating to municipal or community wastewater and drinking water financial assistance. The Agency administers the Water Pollution Control and the Rhode Island Water Pollution Control revolving loan funds created under Title VI of the Federal Clean Water Act and its State counterpart which is known as the Clean Water State Revolving Fund (CWSRF). The Agency also administers the Drinking Water Revolving Loan Fund (DWSRF) created under the Federal Safe Drinking Water Act amendments of 1996. The Agency has established a Community Septic System Loan Program (CSSLP) as part of the Federal Clean Water State Revolving Fund. The Agency also provides conduit loans to municipalities for various water and wastewater systems improvements.

A revolving fund allows for the perpetual availability of funds to assist local governmental units in meeting water quality goals by providing loans and other forms of financial assistance. Our primary goals are to provide low-cost means to reduce pollution caused by wastewater; help provide safe drinking water; and to provide low-interest loans to cities and towns to help citizens repair failed, failing or sub-standard septic systems.

On this, the Agency's 17th anniversary, the CWSRF program that we administer, along with the Rhode Island Department of Environmental Management (DEM) as our regulatory partner, has issued 103 subsidized loans totaling \$632 million to Rhode Island communities and the Narragansett Bay Commission (NBC) as of June 30, 2007. These loans have funded over 258 design and construction projects for the upgrade and improvement of wastewater infrastructure around the State. The Agency also created a program to provide loans for septic system repair or replacement to residents in communities not served by centralized wastewater treatment facilities. The Rhode Island Water Pollution Control Revolving Fund (RIWPCRF), the "State Program", is a direct loan program established to finance water pollution abatement projects that do not qualify for the Federal Revolving Fund. The State Program is also used to make loans to municipalities and wastewater service providers for the update of facility plans as part of the Agency's Facility Plan Loan Program (FPLP). The Agency, in conjunction with the RI Department of Health (DOH) as our regulatory partner, administers the DWSRF Program and has issued 23 subsidized loans totaling \$128 million, and to Shady Acres and Camp Jori which are privately owned suppliers. The Agency also conducted four conduit financings two for Clean Water Projects totaling \$36.2 and two for Drinking Water Projects totaling \$38.9 million.

Financing mechanisms such as leveraged loans, direct loans, and conduit financings help to meet the unique needs of the Agency's borrowers. Bonding for leveraged loans can be conducted on either a competitive or negotiated basis, as the situation requires. Direct loans can be made with new or recycled capital. Conduit financings enable local governmental units to access the bond market.

For the CWSRF, the Agency utilizes capitalization grants from US Environmental Protection Agency (EPA) along with an irrevocable commitment from the State of Rhode Island of 20% State Match dollars to form

the corpus of its financial structure. During this fiscal year the Agency has issued its 2006A Clean Water Pooled Leveraged Issue totaling \$64.633 million in new loans to 9 borrowers.

For the DWSRF, the Agency utilizes capitalization grants from EPA coupled with State Match monies and other financing mechanisms to form the corpus of its financial structure. During this fiscal year, the Agency has issued its 2007A Drinking Water Pooled Leveraged issue totaling \$12.6 million in new loans to 4 borrowers.

The Agency Board of Directors and staff are committed to maintaining a strong programmatic and financial structure as is evidenced by the confidence placed in the Agency by the three nationally recognized rating services who continue to rate Agency Bonds as follows:

| | |
|-------------------|-----|
| Fitch - Ibc | AAA |
| Standard & Poor's | AAA |
| Moody's | AAA |

These high ratings are unequalled in Rhode Island State Government and allow the Agency to issue bonds without insurance costs that are usually borne by the borrowers; thereby saving Agency borrowers additional monies. The Agency continues to provide a one-third (1/3) off the CWSRF borrowers' market rate subsidy and a one-quarter (1/4) off the DWSRF borrowers' market rate making it the most cost-effective provider of infrastructure capital.

Chapter 55 of the 2000 Public Laws, as approved by the voters in the form of Referendum Question #2 at the 2000 general election, provided the Agency with \$57,000,000 to provide loans at a subsidized interest rate of zero percent and \$3,000,000 to be used by the Agency to provide state match monies for federal drinking water grants. To administer loans in accordance with this Act, the Agency has caused there to be created a fund known as the Rhode Island Zero Interest Loan Fund (the "RIZILF").

In conclusion, on behalf of the Board of Directors and the Staff of the Rhode Island Clean Water Finance Agency, we thank you for your support and guidance during the past years of the Agency's existence. The Agency will continue to be a major source of subsidized and/or low-cost loans for clean water and drinking water infrastructure projects in the State. We look forward to working with those who participate in governing, and all the citizens of Rhode Island in improving the quality of our most necessary resource: clean water.

James M. Hagerty, Chairman

Anthony B. Simeone, Executive Director

CONCRETE LINING, NBC, and opposite

AGENCY OPERATIONS, FISCAL YEAR 2007

In keeping with the Agency's motto, "Clean Water for Rhode Island is Our Only Business," the Agency continues to operate on a fiscally sound basis with a goal of continuing to function as an efficient entity and maximizing the use of Agency funds for low-interest loans and assistance. The Agency ended the year with \$943 million in assets, an increase of \$64 million over fiscal year 2006. The Agency's revenues for the year were \$31.3 million, an increase of 1.3% over fiscal year 2006 (unaudited).

The Agency's operating expenses are funded solely from loan service fees generated from managing its programs. Agency staff consists of an Executive Director, an Accounting Manager, a Clean Water SRF Program Manager, a Drinking Water SRF Program

Manager, an Accountant, and an Administrative Assistant. The SRF program is a definitive example of cooperation among Federal, State and local governments.

AGENCY PROGRAMS:

Clean Water SRF - The CWSRF is a subsidized loan program for local governmental units to finance wastewater infrastructure projects. In order for a project to be eligible for funding, the project must be on DEM's Project Priority List (PPL) and have a Certificate of Approval (CA) from DEM. The PPL is updated on an annual basis. Since the inception of the CWSRF, loans totaling \$632 million have been made to municipalities and NBC.

Funding for the program is available from four sources: federal capitalization grants, state match monies, Agency revenue bonds, and revolved capital. The program works as follows:

Federal Capitalization Funds - Federal funds are made available under Title VI of the Federal Clean Water Act that established the loan program. A state match of 20% of the total grant award is required. The annual grant award to the State of Rhode Island is based on a specific percentage of the total made available by Congress for the program. It is not based on project needs in any given year. The Agency has two years to apply for a federal grant after the funds have been appropriated. The Funds can be drawn down over a ten-year period of time.

RI Water Pollution Control Revolving Fund - Established under the authority of Section 46-12.2-6© of the Rhode Island General Laws, this fund receives state capital contribution before the funds are transferred to the CWSRF.

SAWTUCKET, and opposite

The Agency has the authority to use the fund to make loans, issue bonds and receive interest earnings or other capital from public or private sources. The fund has been used to finance projects not meeting the requirements of federal programs. For instance, the Agency made a loan to the Town of South Kingstown in 1992. The loan totaled \$920,000 and is being repaid over a 20 year time period.

Facility Plan Loan Program - As part of the RIWPCRF, this program allows the Agency to make low-interest loans to municipalities so facility plan documents, amendments, or updates can be completed. These facility plans are a prerequisite for funding from the CWSRF. Loans are capped at \$150,000 with an interest rate of 1%. The repayment is over a three-year period. To date, the Agency has made FLP loans to the Town of Bristol in the amount of \$100,000 and the Town of Smithfield in the amount of \$75,000.

Rhode Island Zero Interest Loan Fund – As part of the RIWPCRF, The Rhode Island Zero Interest Loan Fund (“RIZILF”) was established under the authority of Chapter 55 of the 2000 Public Laws of Rhode Island. The RIZILF was structured by the Agency, along with its consultants and input from the cities and towns of Rhode Island, to maximize the number of loans made utilizing the RIZILF. The Agency has determined that one-half (1/2) of the loan will be at zero percent interest and one-half (1/2) of the loan will be at the subsidized interest cost (the “Subsidized Interest Cost”). The RIZILF is used to pay the difference between the Subsidized Interest Cost and the zero subsidized interest cost (the “Zero Subsidized Interest Cost”). The Subsidized Interest Cost is 66 2/3% of the Borrower’s Market Rate. The Zero Subsidized Interest Cost will be 50% of the Subsidized Interest Cost. The Zero Subsidized Interest Cost is calculated based on the Agency’s provision of one-half (1/2) of the loan at zero percent interest and one-half (1/2) of the loan at the Subsidized Interest Cost. Notwithstanding the above, the Zero Subsidized Interest Cost for non-investment grade borrowers (below BBB) is zero percent (0%) interest. Non-investment grade borrowers (below BBB), including those borrowers which were non-investment grade (below BBB) within the twelve months prior to filing a loan application with the Agency, may receive 100% of their loan (up to \$25,000,000) at zero percent interest. The Agency will provide loans at the Zero Subsidized Interest Cost for as long as funds are available. Borrowers are contractually liable for the Market Rate on the loan but are billed only for the Zero Subsidized Interest Cost as long as funds are available in the RIZILF. In the event the RIZILF is wholly or partially depleted, the Agency may require the borrower to pay up to the Subsidized Interest Cost. In the event of a default by the borrower or other borrowers, the

WOONSOCKET, and opposite PAWTUCKET

Agency may bill the borrower for the Market Rate. To date, the Agency has made 46 loans totaling \$222 million of zero interest loans.

Community Septic System Loan Program - The Agency, in cooperation with DEM and the Rhode Island Housing (RIH), successfully launched its CSSLP as part of the CWSRF in the spring of 1999. The Agency has engaged RIH to be the homeowner loan administrator for the CSSLP. The CSSLP allows communities without wastewater treatment facilities to access low-interest cost SRF funds for the repair or replacement of failed, failing or substandard septic systems. Communities are able to access these funds after completing an On-Site Wastewater Management Plan approved by DEM. Once the plan appears on DEM's PPL and the CA is obtained, the community will negotiate a loan with the Agency. Once the loan is negotiated, the community may then allow residents to access the funds. The borrowing cost for the homeowner will be 2%. (Note: as part of the Governor's Initiative to clean up Narragansett Bay the Agency lowered its rate to the homeowner from 4% to 2 % as of February 2004) for a term up to ten years.

The Agency uses federal dollars recycled from previous CWSRF loans to provide the source of funds for the CSSLP. The Agency has made 15 CSSLP Loans totaling \$4.15 million.

The Agency anticipates that future loans addressing non-point source pollution problems, when combined with other pollution abatement loans made by the Agency, will further assist the State of Rhode Island in meeting its long-term water quality improvement goals.

Drinking Water SRF - The DWSRF was created in 1996 by the Safe Drinking Water Act Amendments to finance public drinking water projects. The DWSRF provides low-interest loans to local government units and publicly and privately organized water suppliers. Projects relate to the planning, design and construction of safe drinking water supply, treatment and transmission infrastructure. The DOH has prepared a Project Priority List to rank potential projects according to several health and economic criteria prior to eligibility for DWSRF financing. The focus of the program, as mandated by the federal government, is toward small water suppliers and disadvantaged systems. A small water supplier is defined as one serving fewer than 10,000 persons. A disadvantaged system is defined as one whose system improvements would dramatically increase water rates paid by consumers as it relates to median household income.

CAPRON FARM, WARWICK, and opposite

The DWSRF receives federal funding under Section 1452 of the Safe Drinking Water Act Amendment of 1996 with the state providing a 20% state match. Initially, the program provided direct loans with an interest rate subsidy of 25% off a water suppliers' market rate of borrowing. As the frequency of loan applications and loan amounts have increased, the Agency has utilized a leveraged financial structure in 2004 so as to maximize the dollar amount available for loans. Funds will be used to:

- Assist small systems in preparing application for revolving fund assistance.
- Assist all public water supply systems in maintaining financial, managerial and technical abilities and maintain compliance with the Safe Drinking Water Act Amendments of 1996.
- Assist small systems in meeting compliance with the act.

To date, the Agency has made a total of \$128 million in Drinking Water Loans.

How Does the State Revolving Fund Work for Rhode Island?

Step 1

The EPA and the State of Rhode Island commit capital to the fund.

Step 2

Construction money is raised by one or both of the following methods:

A. Federal and State capital is used as collateral to raise funds in the bond market by a process called leveraging. This method is used when there is a great need for construction dollars.

B. Federal and State capital is loaned directly to the borrowers without accessing the bond market. This method is used when project demand is low and/or when credit conditions warrant.

Step 3

Borrowers pay back their loan to the Fund, usually over 20 years. The loans carry an interest rate of one-third off the borrower's market rate for the CWSRF and one-quarter off the borrower's market rate for the DWSRF. These subsidized interest rates allow communities to save millions of dollars in interest costs over the life of the loan.

Step 4

The repayment stream from earlier borrowers becomes the source of funds for later borrowers. In this way, the State Revolving Fund is perpetual and will always be available to local governmental units in Rhode Island.

CAPRON FARM, WARWICK, and opposite

Fiscal Year 2007 Agency Highlights

FY07: \$64,663,000 in construction loans to eight communities and NBC (Series 06A) from the CWSRF, a \$300,000 loan to the Town of Charlestown, a \$300,000 loan to the Town of South Kingstown, a \$300,000 loan to the Town of Tiverton, and a \$300,000 loan to the Town of North Kingstown from the CSSLP.

FY07: \$12,600,000 in construction loans to four communities from (Series 07A) from the DWSRF.

Previous Fiscal Year's Highlights

FY06: \$57,479,000 in construction loans to nine communities and NBC (Series 05A) from the CWSRF, and a \$300,000 loan to the Town of South Kingstown and a \$250,000 to the Town of New Shoreham from the CSSLP.

FY06: \$338,500 loan to the Town of West Greenwich from the DWSRF.

FY05: \$76,016,000 in construction loans to seven communities and NBC (Series 04A) from the CWSRF, and a \$250,000 loan to the Town of Charlestown from the CSSLP. And a \$300,000 loan to the town of Jamestown.

FY05: \$44,624,287 in construction loans to four water suppliers from the DWSRF.

FY04: \$73,300,000 in construction loans to six communities and NBC (Series 03B) from the CWSRF, and a \$250,000 loan to the Town of Johnston from the CSSLP. The Agency also had a \$7,719,000 conduit financing for sewer line force main & pump station improvements for the community of West Warwick.

FY04: \$47,189,000 in construction loans to five borrowers (Series 2004A) from the DWSRF. The Agency also had a \$26,995,000 (Series 2003 A & B) conduit issue for the City of Pawtucket.

FY03: \$93,600,000 in construction loans to three communities and NBC (Series 02B), \$20,923,000 in construction loans to the Town of West Warwick (Series 03A), and \$4,000,000 in direct loans to the Town's of Narragansett and South Kingstown for their share of the Rose Hill Landfill Superfund Site Clean-up from the CWSRF, and a \$300,000 loan to the Town of South Kingstown from the CSSLP.

FY03: \$200,000 to Kingston Water District, \$2 million to the Providence Water Supply Board, \$300,000 to Prudence Island, and \$10,165,250 to the City of Woonsocket from the DWSRF.

FY02: \$32,245,000 in construction loans to five communities (Series 02A),

\$500,000 bridge loan to the Town of Jamestown, and a \$1,000,000 direct loan to the Town of Middletown out of the CWSRF, a \$250,000 loan to the Town of New Shoreham and \$300,000 loan to the Town of North Kingstown out of the CSSLP and a \$57,000,000 loan to NBC from the RIW-PCRF.

FY02: \$2.5 million to the Providence Water Supply Board from the DWSRF.

FY01: \$28.2 million in construction loans to two communities (Series 00A), \$250,000 to the Town of Glocester out of the CSSLP and an \$800,000 bridge loan to the City of Newport from the CWSRF.

FY01: \$5.2 million to the Providence Water Supply Board and Pascoag Utility District from the DWSRF.

FY00: \$28.5 million in construction loans to six communities (Series 99C) and a \$255,000 loan to the Town of Westerly from the CWSRF.

FY00: \$5.01 million to the Providence Water Supply Board and Shady Acres from the DWSRF.

FY99: \$27.4 million in construction loans to the Town of Narragansett and NBC as part of the CWSRF (Series 99A) and \$75,000 to the Town of Smithfield for a Facility Plan Loan from RIWPCRF. The Agency also made its first CSSLP Loan to the Town of Charlestown in the amount of \$250,000. A \$16.8 million Water Pollution Control Subordinated Refunding Revenue Bonds Series 1999B. As an added benefit to our borrowers, the Agency, along with its advisors, reviewed its outstanding Bond Issues to determine which bonds, if any could be advanced refunded to create debt service savings to be passed on to the Agency's borrowers. In FY99, the Agency sold \$16.8 million in clean water bonds to refinance portions of the Series 92 and Series 94 outstanding bonds. The interest savings will be passed on to the borrowers in those series, based on borrowers' allocable share of amount refunded. The savings will be applied as credits against the original debt service schedule of each original loan.

FY98: \$11.4 million in construction loans to two communities from the CWSRF and \$100,000 to the Town of Bristol for a Facility Plan Loan from the RIWPCRF. The Agency also had a \$28,495,000 conduit financing for the Privatization of the City of Cranston Wastewater Treatment Facility.

FY 97: \$18.57 million in construction loans to two communities and NBC from the CWSRF.

FY 96: \$7.1 million in construction loans to four communities (Series 95) from the CWSRF.

FY 95: A \$12 million conduit financing for the Providence Water Supply Board from the DWSRF.

FY 94: \$24.56 million in construction loans to four communities and the NBC (Series 94) from the CWSRF.

FY 93: \$36.61 million in construction loans to six communities and the NBC (Series 93) from the CWSRF.

FY 92: \$23.58 million to seven communities and the NBC (Series 92) from the CWSRF.

FISCAL YEAR 2007
