

## Efficient Buildings Fund Application for Energy Partner Services

---

### Overview of Services

The RIIB seeks to assist local governmental units in identifying potential energy savings through the implementation of energy efficiency and/or renewable energy projects by offering the services of an energy partner at no cost. The energy partner will act as an independent energy manager for multiple public entities and will be precluded from bidding for and implementing any associated energy projects. The partner will be on contract through the RIIB for one fiscal year, from July 1, 2016 to June 30, 2017. The energy manager will work with the local governmental unit to:

- Identify those public buildings with the greatest potential for energy usage reductions through the implementation of energy efficiency measures;
- Recommend specific energy efficiency measures to be implemented;
- Identify contractors/vendors that can implement energy efficiency measures, including energy audits of the specified public buildings;
- Work with each local governmental unit, the Rhode Island Office of Energy Resources (OER), National Grid (or utility) and the RIIB to determine the most cost-effective energy efficiency measures to reduce energy usage;
- Identify opportunities for the expansion of renewable energy resources;
- Provide other technical assistance related to reducing energy usage through the implementation of energy efficiency measures;
- Draft the Efficient Buildings Fund project application template; and
- Support communication with residents and other stakeholders as requested.

Eligible entities include municipalities, public schools and other local governmental units. If your entity would like to request these services at no cost, please complete the following form and return to Michael Baer at [mbaer@riinfrastructurebank.com](mailto:mbaer@riinfrastructurebank.com) by **Friday, June 24, 2016**.
